SUMMARY

Aspiring Data Analyst with hands-on experience in building data pipelines, cleaning complex datasets, and developing machine learning models using Python. Proficient in SQL, Power BI, Pandas, and Scikit-learn with a strong foundation in turning raw data into actionable solutions.

TECHNICAL SKILLS

- **Languages:** Python (Pandas, NumPy, Scikit-learn, Tkinter), SQL, HTML, CSS, JavaScript.
- **Data Analytics:** Machine Learning Modeling, Exploratory Data Analysis (EDA), Data Cleaning, Power BI (DAX).
- **Tools & Frameworks:** Django, Odoo, Git/GitHub, Microsoft Excel (Advanced Formulas & Functions).
- **Domain Knowledge:** ETL Pipelines, Database Management, Automation, Data Integrity.

PROJECTS

Diabetes Risk Prediction — Machine Learning Pipeline

- Engineered an end-to-end ML pipeline using **Scikit-learn** to predict diabetes risk, achieving **90% accuracy** and **ROC-AUC > 0.90**.
- Managed data preprocessing and applied SMOTE to handle class imbalances, ensuring model fairness and predictive reliability.

Global COVID-19 Analytics — Power BI Dashboard

- Designed interactive dashboards to track global health metrics, utilizing Power Query for ETL and DAX for dynamic filtering.
- Visualized critical KPIs and time-series trends to drive data-informed storytelling and regional analysis.

PROFESSIONAL EXPERIENCE

Edoxi Training Institute

Python Instructor (Part-time & Freelance)

Dubai, UAE

Dec 2022 – Present

- Lead technical instruction on Python, focusing on data structures, OOP, and real-world project development.
- Guide students through the development of functional Python applications and automation scripts to solve practical problems.

Groware Global

Associate Web Developer

Thiruvananthapuram, India

Jun 2021 – Feb 2022

- Engineered robust backend applications using Django and optimized SQL-based databases to ensure data integrity.
- Developed a comprehensive Learning Management System (LMS) within a cross-functional team environment.

SCTIMST

Apprentice Technician - Computer Engineering

Thiruvananthapuram, India

May 2019 – May 2020

- Managed healthcare databases and performed critical updates to maintain smooth administrative workflows.
- Provided technical support for network administration and departmental coordination.

CERTIFICATIONS

Data Science and Machine Learning Training

Entri Elevate
